GRAPH SCHEMA

IMPORT RESULTS

- The dataset was successfully imported into Neo4j AuraDB.
- Imported data includes study programmes, courses, study fields, course topics and learning outcomes.
- The import created nodes and relationships based on the defined schema.

CONCLUSION

- A knowledge graph was created in AuraDB using the provided study programme dataset.
- The graph connects programmes, courses, study fields, topics and learning outcomes.
- Cypher queries were used to explore relationships and retrieve useful insights from the graph.
